rekordbox for Developers

XML playlist

You can now display your rekordbox playlists in the [Bridge] pane by importing playlist information from an XML file.

- 1) Create an XML file and save it in your desired location.
- 2) Open the previously created XML file in a text editor. The first row should be displayed as follows:

Download<

<https://rekordbox.com/en/download>

must follow a format which rekordbox supports. You can view a list of XML formats which are supported by rekordbox [here < https://cdn.rekordbox.com/files/20200410160904/xml_format_list.pdf>](https://cdn.rekordbox.com/files/20200410160904/xml_format_list.pdf)

- 3) Start up rekordbox and select the generated XML file you want to import under [File]->[Preferences]->[Bridge]->'Imported Library'.

※ Multiple playlists or playlist folders with the same name can't exist in the same level of a directory.
